

Post 16 Geography

Without Geography,
you're nowhere!

Could
Geography
be the
right direction
for you?

Why choose Geography?

The world in which we live is likely to change more in the next 50 years than it has ever done before. **Geography explains why**, and helps to prepare you for those changes.

The **transferable skills** which geography fosters are an asset in the **complex world of employment** today.

Geography is about the future and encourages **flexible thinking**.

Geography tackles the big issues:

- environmental responsibility
- our global interdependence
- cultural understanding and tolerance
- commerce, trade and industry.

Geographical study fosters these qualities and provides a firm basis for life-long learning.

What do Geographers do?

Is geography a good choice in terms of getting a job?

Compared to other subjects, geography graduates are among the most employable. They possess the skills that employers look for. In part this is because the subject combines a knowledge of science and an understanding of the arts.

Career destinations for Geography graduates...
